**Please Read:**  
**Special B-Model Conversion Kit Considerations**

- No exchanges of legacy Sonex or Waix parts are available.
- Builders will have to get their projects to a defined "starting point" for conversion. That may mean either building-up to the point where changes begin to take place or removing parts to get "back" to the starting point of conversion changes.
- Depending upon a project's status and condition, builders may need to fabricate or purchase replacement legacy (A-Model) parts at additional expense that are not part of the conversion kit. This will be more likely if builders need to remove parts to return to the conversion's defined "starting point."
- No "partial conversions" will be supported — Sonex can only offer support for construction as defined in the plans that are provided for conversion.
- Wing conversion kits do not include new B-Model wing skins, as the conversion is most economically made by trimming existing wing skins. Builders may opt to purchase new B-Model wing skins at additional expense.
- Builders must retain their original legacy plans set with their projects and legacy aircraft serial numbers will not be valid for building additional projects. Legacy aircraft that have been converted will receive a version of their original serial number that includes a conversion designator.

**\*\*Spare Canopies** are required for all international fuselage kit orders.

**Order Confirmation:** A detailed, formal order confirmation including lead-time will be emailed to the email address on this form. This document requires your review/response & approval. If the freight cost is not included within the initial Order Confirmation, expect a revision requiring payment to follow.  
**\*Plans Purchase:** Customer must purchase plans prior to purchasing any B-Model Conversion Kit. Customers must be current Sonex or Waix planholders to purchase.
